Update of the transition strategy to promote the use of cleaner technologies and fuels

Following the guidelines set forth in the Energy Transition Law (ETL) and its regulations, the Ministry of Energy issued an agreement updating the strategy to promote the use of cleaner fuels and technologies (“Strategy”), published in the Federal Official Gazette on February 7.

The Strategy has three main objectives:

- 1) Establishing the goals and concrete actions to attain them.
- 2) Promoting the reduction of pollutant emissions from the electricity industry.
- 3) Reducing dependence on fossil fuels.

The ETL sets the following minimum targets for clean energy in electricity generation:

» 2018: 25%

» 2021: 30%

» 2024: 35%

In this regard, the Strategy provides the following clean energy generation goals:

YEAR	PERCENTAGE OF TOTAL ELECTRICITY GENERATION
» 2024	35.1%
» 2033	39.9%
» 2050	50%

The Strategy introduces three main lines of action for achieving the above goals, as follows:

- 1) Energy-saving and efficient use in the following sectors:
 - a) Transportation
 - b) Industry
 - c) Buildings
 - d) Municipal public services
 - e) Agro-industry

 - 2) Clean energy utilization through the following alternatives:
 - a) Bioenergy
 - b) Wind energy
 - c) Solar energy
 - d) Geothermal energy
 - e) Hydropower and ocean energies
 - f) Carbon capture and storage
 - g) Development and social impact

 - 3) Development of inclusive infrastructure, in the following fields:
 - a) Smart grids and distributed generation
 - b) Storage
-
